ABOUT US

Introducing Valid Block, a leading crypto validator based in Armenia. Our CEO, Mr. Timofey Orion Cantu, heads this innovative company that already serves as a trusted validator for BNB, Solana and Matic. With a focus on security and efficiency, Valid Block is committed to providing top-notch validation services in the cryptocurrency market. Join us and experience a new way of earning with our cutting-edge validation solutions.

VALIDBLOCK.AI

Web3, Aggregated

Token aggregator" typically refers to a platform or service in the cryptocurrency and blockchain space that consolidates and aggregates various tokens from multiple decentralized exchanges (DEXs) or other sources. This allows users to access a wide range of tokens and liquidity in one place,

Automation

Automation in blockchain relies on crypto validators to execute smart contracts, ensuring they operate without human intervention. Validators help automate processes, reducing manual errors and increasing transaction efficiency.

The Most Adopted Scaling Technology

Crypto validators often support Layer 2 scaling solutions, the most adopted scaling technology, to handle more transactions efficiently. These solutions relieve the main blockchain, ensuring faster and cheaper transactions while maintaining security.

Enhanced Accuracy

Enhanced accuracy in blockchain transactions is achieved through crypto validators, who meticulously verify each transaction. This process ensures the correctness and reliability of data recorded on the blockchain.

WHAT IS BLOCKCHAIN VALIDATOR?

A validator is a participant in a Proof of Stake (PoS) blockchain network that is responsible for validating new transactions and maintaining the security of the blockchain. Validators do this by staking their crypto to support the network

WHAT IS MATIC COIN?

Polygon has its own cryptocurrency, called MATIC, which is used to pay fees on the Polygon network, for staking, and for governance (which means that MATIC holders get to vote on changes to Polygon). You can also buy and sell MATIC via Coinbase and other exchanges.

The name MATIC comes from an earlier stage in Polygon's development. After launching as Matic Network in October 2017, developers rebranded as Polygon early in 2021.

WHAT IS FUTURE OF MATIC COIN ?

WHAT PRICE CAN POLYGON REACH BY THE END OF 2024?

MATIC price could possibly close its trade for 2024, with a pricier tag of \$6.91.

IS MATIC A GOOD INVESTMENT?

Yes, MATIC is a profitable investment, the digital asset should be under due consideration for the long term.

HOW HIGH CAN POLYGON (MATIC) GO BY THE END OF 2025?

According to our MATIC price prediction, the altcoin could possibly reach a maximum of \$5.0678 by the end of 2025. With a potential surge the price could go as high as \$23.040 by the end of 2030.

WHAT IS FUTURE OF MATIC COIN ?

IS POLYGON (MATIC) BETTER THAN SOLANA?

While it is not a direct apples-to-apples comparison, as one is a layer-2 and the other is a layer-1. Polygon currently stands stout with its robust network.

HOW HIGH CAN POLYGON MATIC GO?

At its best, Polygon can process 65,000 transactions per second.

WHY POLYGON IS FASTER THAN ETHEREUM?

The major functionality of Polygon is to enable the multichain Ethereum ecosystem. It provides a network that offers interoperability between previous and present infrastructure scenarios of Ethereum.

WHAT IS FUTURE OF MATIC COIN ?

CAN POLYGON HIT \$100?

Matic Price Prediction \$100, It is possible for Polygon Matic to reach \$100 over the next 18 years.

IF I HAD INVESTED \$100 IN POLYGON IN 2020, WHAT WOULD IT BE WORTH NOW?

Your investment of \$100 in Polygon in 2020, considering at \$0.022 (high of Dec 2020), would be now worth approximately \$3554.55, with a percentage gain of 3454.55%

INTRODUCTION TO VALID BLOCK BUSINESS MODEL

Valid Block is an innovative blockchain-based business model designed to maximize staking and Return on Investment (ROI) opportunities for its participants. By leveraging a network of primary and sub-validators, BlockValid offers a sustainable and lucrative earning model for individuals and organizations looking to capitalize on blockchain technology.

VALID BLOCK NETWORK

The VBN NETWORK is a decentralized wireless network for IoT devices, utilizing a blockchain-based incentive model. Users deploy Hotspots, which are devices that provide network coverage and earn Helium's cryptocurrency, VBN, through a process called Proof-of-Coverage. The network uses the LoRaWAN protocol for long-range, low-power connectivity and employs Data Credits, generated by burning VBN to pay for network usage. This setup supports various IoT applications like smart agriculture and asset tracking.

Proof-of-Coverage (PoC): A unique work algorithm used by Helium to verify that Hotspots are located where they claim to be and are providing legitimate wireless coverage.

TERMS & CONDITION

- Withdraw as low as 50 Matic Instantly!
- 10% Fee applies on each withdrawal.
- Principal withdrawals require admin approval within 48 business hours.
- Start investing with a minimum deposit of 50 Matic multiples.
- Receive your ROI from Monday to Friday.
- Becoming a validator requires community voting.
- You cannot withdraw from the Validator package, but you can sell it to someone
- Unlock Triple Earnings on Your Investment Package
